

Executive Training on Navigation and Survivorship

A no-cost online training from the George Washington University (GW) Cancer Center's Online Academy

OVERVIEW

Through a series of self-paced modules, the training walks participants through:

- The process of planning and developing patient navigation and cancer survivorship programs
- Identifying needs
- Funding and sustaining your program
- Evaluating your program
- Creating a business plan

LEARNING OBJECTIVES

Participants will be able to:

- Understand the importance of effective program planning
- Identify principles or techniques for conducting a needs assessment
- Determine key measures for demonstrating value

AUDIENCE

Administrators, health care providers, cancer control and other public health professionals can all benefit from this training. Visit our website to learn more about continuing education credits offered.
