Approaches or techniques used to enhance the adoption, implementation, sustainment and scale-up or spread of evidence-based interventions are:

- Implementation strategies
- Behavior change theories
- Implementation outcomes
- Intervention mapping

---

Which category of implementation strategies would be best to focus on if your site has identified barriers related to clinicians not seeing the advantage of implementing the innovation compared to keeping things the same?

- Quality management
- Restructure
- Educate
- Attend to policy context

---

Which category of implementation strategies would be best to focus on if your site has identified barriers related to reminding clinicians to prompt for screening?

- Quality management
- Incentivize
- Educate
- Attend to policy context
